Warrior Solutions Sponsors Denver Centennial Chapter AUSA Annual Fundraiser

Boulder, Colorado – Warrior Solutions will sponsor the Denver Centennial Chapter of the Association of the United States Army 2007 annual golf tournament fundraiser by providing copies of the Leader’s eBook software application for auction at the event, as well as by contributing to tournament costs. The tournament will take place at Raccoon Creek Golf Course on June 25th. Funds raised by the tournament are used to support the Denver Centennial Chapter outreach programs, including:

UNITED SERVICES ORGANIZATION (USO) – Provides comfort, food, rest areas, communication options and counseling to military personnel in travel status.

FISHER HOUSE –Temporary residence for dependents of service members who are hospitalized due illness or injury suffered in the line of duty.

UNITED VETERANS COMMITTEE – A coalition of military related organizations and associations, dedicated to the improvement of overall status of Military Veterans and Retirees.

About the digitized leader's book

"I said goodbye to my 3-ring binder and pocket notebook when I discovered Warrior Solutions Leader's eBook. The software is versatile enough to adapt to any leadership environment. Instead of having to run to the personnel office for information on my Soldiers, I simply pull it from my pocket. No leader of troops should be without this valuable tool in their kit bag." MAJ

The Leader's eBook is a digitized leader's notebook that saves small unit leaders valuable time and provides them with a valuable war-fighting reference guide. The Leader's eBook resides on desktop and laptop computers, as well as on hand-held PDAs. It provides a rich structure for capturing the information that every leader must have about their soldiers. It also contains many reports that leaders need to answer questions about their commands.

Information is the nervous system of any organization and the U.S. Army is no exception. Up-to-date information is invaluable on the battlefield, but long before the battle is joined, information plays a critical role in the preparation for battle.

For the small unit leader working with individual soldiers, a leader's book maintains information about everything from uniform sizes, assigned equipment, medical information, military background, weapons qualifications, vehicle licenses, family status, physical fitness scores, job proficiencies, and much more. Each day, small unit leaders spend valuable hours recording new information and updating old.

Up until now, this data has been recorded and maintained in paper leader's books. The leader's book system of information management requires repetitive data manual entry and is difficult to share among leaders. And it is subject to being lost or damaged during the rigors of military life. Small unit leaders spend up to eight hours per week maintaining routine data records, sharing data, and writing reports, keeping them from other more important mission-critical military responsibilities. Now, with Warrior Solution's Leaders eBook, small unit leaders can carry an in-depth personnel database on a light-weight hand-held device. *"As a full-time Training NCO, and as a Section SGT during unit drills, Warrior Solutions software is invaluable in helping me keep all my people straight and stay on top of things. The PLT Personnel app does wonders for managing NCOER's, licensing...all the admin stuff that one can get caught behind on. This is a must-have item."* Section SGT/Training NCO
