## Press Release

Boulder, Colorado – Warrior Solutions, Inc., announced today the release of Version 3.0 of its *Leader's eBook* software for small unit leaders in the U.S. Army. Version 3.0 includes many new features and upgrades requested by sergeants, lieutenants, and captains using the *Leader's eBook* around the world. New features include a custom report writer, Army physical fitness test (APFT) calculator, customizable tables and fields, import from other databases, and leadership documents, among others.

The *Leader's eBook* is software that runs on both personal digital assistants (PDAs) from major vendors such as Palm, Hewlett Packard, Dell, Sony, and others; and synchronizes with software running on standard Wintel desktop computers, laptops, and tablet PCs. This allows information to be entered in the office, in the field, and wherever small unit leaders are working. Data is quickly synchronized between PC and PDA when a leader returns to the office, and can be exchanged between leaders in the field by “beaming”<sup>1</sup> data from one PDA to another. The *Leader's eBook* reduces the weight of a traditional paper leader's notebook from three to five pounds to the negligible weight of a single PDA. Using the *Leader's eBook*, small unit leaders typically reduce routine administration chores by four to eight hours each week

The *Leader's eBook* is comprised of three integrated components: a *Leader's Personnel* module, a *Leader's Guide* module, and a *Leader's Tools* module. The *Personnel* module includes individual soldier information such military history, family data, job qualifications, and other soldier data required for the smooth execution of daily operations. The *Leader's Guide* is derived from the U.S. Army's *Combat Leader's Guide* and contains basic instructions and memory aids for combat operations. The digital *Leader's Guide* provides access to this critical information far more quickly than by flipping through the pages of a printed document. The final component of the *Leader's eBook* is the *Leader's Tools* module that includes a number of calculators commonly needed by small unit leaders, including physical fitness scoring, percentage fat calculations, U.S to metric conversion, a range-finding calculator, a risk management calculator, among others.

The *Leader's eBook* is currently available through Warrior Solutions, Inc. A free trial is available for download on the web at [www.warriorsolutions.com](http://www.warriorsolutions.com). With the slogan *Organize Before You Mobilize*, Warrior Solutions, Inc. is committed to providing cutting edge software solutions for military leaders.
